Welcome
- SACOG Board Chair Leslie McBride, Yuba City
- Sacramento State Provost Dr. Joseph Sheley
- SACOG Director Christopher Cabaldon, West Sacramento

Blueprint Retrospective — Video

Blueprint Successes and Challenges:
  Mike McKeever
  SACOG Executive Director

Local Blueprint Implementation Highlights — Video

Speaker: Stephen Levy  
  Director, Center for Continuing Study for the California Economy

Speaker: John Fregonese  
  Principal, Fregonese Associates

Speaker: Dr. Manuel Pastor  
  Director, Program for Environmental and Regional Equity  
  University of Southern California

Blueprint Implementation Next Steps

Recorded Messages from Community Leaders, State Senate, and Congress

Audience Polling will occur throughout the program
Stephen Levy is director and senior economist of the Center for Continuing Study of the California Economy (CCSCE) in Palo Alto. CCSCE is a private research organization founded in 1969 to provide an independent assessment of economic and demographic trends in California. CCSCE works with public institutions and private companies that require an explanation and analysis of California growth trends including detailed projections. Levy is the principal author of CCSCE’s annual report series on the California economy. CCSCE’s annual reports have acquired a national reputation for credible and independent analyses.

CCSCE’s latest projection report California County Projections—2009/10 Edition was released in November 2009. Levy writes a new series Numbers in the News—monthly memos on current topics and an occasional blog, both of which are available on the CCSCE website.

CCSCE prepares long-term economic and demographic projections for public and private sector organizations in California. Recent clients include SCAG, SACOG, MWD, The Irvine Company, and the city of San Jose.

Levy has worked extensively on how the state budget and economy are related. He created the California Budget Challenge in partnership with Next Ten. Levy also worked with California Forward on linking future economic and demographic trends in California to state budget issues. He is a member of the NOV A (Silicon Valley) Workforce Board, the Board of the Bay Area Council Economic Institute, and the Economic Allocation Advisory Committee to the Air Resources Board for AB 32 implementation and economic impact evaluation.

Stephen Levy has degrees in Economics from MIT and Stanford University.
As principal of Fregonese Associates, John Fregonese operates a full service planning firm that specializes in visioning, comprehensive and small area planning, implementation strategies, and public involvement strategies.

Fregonese has been a planner for 30 years, where he has earned the rare reputation of being able both to create an energizing vision for communities and to develop concrete, workable solutions to urban problems. Fregonese is known for his work in Portland, Oregon, where he served as the planning director for five years for the regional government, Metro, and was the primary author of the regional growth concept known as Metro 2040. It is recognized nationally and has been the recipient of many national awards.

Since founding the firm in 1997, Fregonese has led a variety of planning projects, including some of the most nationally significant regional plans in recent decades. He was a key consultant in the Envision Utah process, an ongoing regional plan that has garnered national recognition, as well as the lead consultant for Chicago Metropolis 2020, the initiative by the Chicago Commercial Club to reprise the seminal Chicago Plan of 1909.

He was the consultant for Compass Blueprint, the regional vision for SCAG; Louisiana Speaks, Louisiana’s first regional plan for southern Louisiana; and Big Look Task Force, a committee mandated to comprehensively review Oregon’s planning system.

In addition to his regional plans, Fregonese has led numerous comprehensive plans for large cities such as Denver and Dallas, plans and visions for small cities with ethnically diverse populations such as Watsonville and Compton, California, as well as numerous small area plans for downtowns, neighborhoods, and other areas such as Talent, Oregon, Mountlake Terrace, Washington, and Long Beach Boulevard in Long Beach, California.
Dr. Manuel Pastor is Professor of Geography and American Studies & Ethnicity at the University of Southern California where he also serves as director of USC’s Program for Environmental and Regional Equity and co-Director of USC’s Center for the Study of Immigrant Integration. Founding director of the Center for Justice, Tolerance, and Community at the University of California, Santa Cruz. Pastor holds a Ph.D. in economics from the University of Massachusetts, Amherst, and has received fellowships from the Danforth, Guggenheim, and Kellogg foundations, and grants from the Irvine Foundation, Rockefeller Foundation, Ford Foundation, National Science Foundation, Hewlett Foundation, California Environmental Protection Agency, California Wellness Foundation, and many others.

In recent years, his research has focused on the economic, environmental, and social conditions facing low-income urban communities in the United States, resulting in numerous published articles. His most recent book, co-authored with Chris Benner and Martha Matsuoka, is “This Could Be the Start of Something Big: How Social Movements for Regional Equity are Reshaping Metropolitan America” (Cornell University Press, 2009).

Dr. Pastor speaks frequently on issues of demographic change, economic inequality, and community empowerment and has contributed opinion pieces to such outlets as the *Los Angeles Times*, *San Jose Mercury News*, *Los Angeles Business Journal*, and *Christian Science Monitor*. He served as a member of the Commission on Regions appointed by California’s Speaker of the State Assembly, and in January 2002 was awarded a Civic Entrepreneur of the Year award from the California Center for Regional Leadership. He was a member of the Regional Targets Advisory Committee for the California Air Resources Board and is also a member of the Building Resilient Regions research network sponsored by the MacArthur Foundation.

Celebrating 25 Years of Grantmaking,
Community Partnerships
and Commitment to Promote
Health and Quality of Life

Save money and energy with energy efficient TVs,
computers and monitors. SMUD, your customer-owned electric utility,
is working with manufacturers and retailers to make it easy to find
electronics that use up to 30% less electricity.

Look for ENERGY STAR® electronics with the SMUD SAVE label for
greater energy savings at participating retailers.

Saving energy today keeps bills low, maintains reliable electric
service, and helps build a cleaner, healthier environment for tomorrow.
