

2005 SEMINAR SERIES

BLUEPRINT IMPLEMENTATION

TOPIC

**Multi-modal streets—
what are the realities of
designing pedestrian-
oriented streets and how
can they be designed to
meet multiple objectives?**

Hear the views of experienced professionals who plan, design and develop physical environments.

**Wednesday
June 22, 2005
1:00 - 3:00 p.m.**

Sacramento Area
Council of Governments
1415 L Street
Suite 300
Sacramento, CA

Communities are seeking more pedestrian and transit-oriented street designs, yet are struggling to meet level-of-service standards for automobile traffic flows, emergency vehicles and other needs. This workshop will present options on how some jurisdictions and planned communities have addressed multi-objective street designs, and some of the trade-offs involved.

PANELISTS

- **Ron Milam**, Principal and Director of Research and Development, Fehr and Peers
- **Heidi Tschudin**, Consulting Planner, Tschudin Consulting Group
- **Ed Cox**, Bike and Pedestrian Coordinator, City of Sacramento
- **Paul Walsh**, Director of Planning, Williams + Paddon Architects

This workshop is designed for local government planning and public works staff persons, but is open to all interested parties. No RSVP needed.

If you have any questions regarding the program or seminar series, please contact Greg Chew of SACOG at (916) 340-6227 or at gchew@sacog.org
